INTRODUCTION

IN compiling this Catalogue we have OMITTED MANY VARIETIES not usually stocked by the LOCAL STORES, but they can be supplied by them in the course of a few days, as we carry the MOST COMPLETE STOCK of all varieties of Vegetable Seeds, and also all the NAMED SORTS and SEPARATE COLOURS of FLOWER SEEDS. Our supplies are grown for us UNDER CONTRACT in the principal SEED GROWING CENTRES of the World. We supply most of the MARKET GARDENERS, also the SEEDLING GROWERS and FLOWER RAISERS in the State.

Our seeds should be procured from the LOCAL STORES, who will be found in almost every town in the Commonwealth, but if there is any difficulty in securing MARTIN & O'KEEFFE'S SELECTED SEEDS, write us direct.

We will be pleased to answer any enquiries, and information given will be backed by 50 YEARS' practical Seedsmen's experience, operating throughout the Commonwealth.

Special Attention is drawn to the Conditions of Sale

WE believe that all Seeds, Bulbs and Roots sold by us are of the description and kind specified by us at the time of sale, but owing to the practical impossibility in many cases of being certain of this we give no undertaking that such Seeds, Bulbs or Roots will correspond with the description under which they are sold, and we make all sales subject to this condition. We further give no warranty, expressed or implied, as to their growth, description, quality or productiveness, and will not be in any way responsible for the crop. If the purchaser does not accept the goods sold to him on these terms they are at once to be returned to us.

Seed Merchants and Growers,

7 ULTIMO ROAD, HAYMARKET, SYDNEY.

Choice Vegetable Seeds

ARTICHOKE (Globe). 6d. pkt.

ASPARAGUS (Colossal). 6d. pkt.

BEANS 6d. pkt., 9d. post paid.

Plant in rows two feet apart and four inches between the plants. Sow in Spring, when danger from frost is over, till the end of Summer.

Beans, Canadian Wonder.

DWARF, FRENCH—

Canadian Wonder—

Our superior strain is extra selected. Blue Wonder—Purple pods, become green when cooked.

Emperor William (White Wonder)—A splendid variety for home use.

Feltham Prolific—Early.

Brown Beauty—Heavy cropper, attractive appearance, is now the favourite market garden variety.

New Discovery—Immense cropper, fine long pods.

Staley's Surprise—Heavy cropper, long slender pods.

Tweed Wonder—Similar to Canadian Wonder, but shorter pods.

Detroit Dark Red (Beet)—An excellent globe-shaped sort.

DWARF BUTTER OR WAX—

The Startler—The best sort.

RUNNER OR POLE—

Epicure—The best everbearing stringless French Runner Bean.

Glory of Summer (Golden Harvest)—green pods, 10 inches long.

Kentucky Wonder—Stringless.

Scarlet Runners—Pods large.

Snake or Yard Long—Stringless.

BROAD BEANS—

Sow during Autumn and Winter in single rows a yard apart and 9 inches between plants.

Leviathan Early Long Pod—The best.

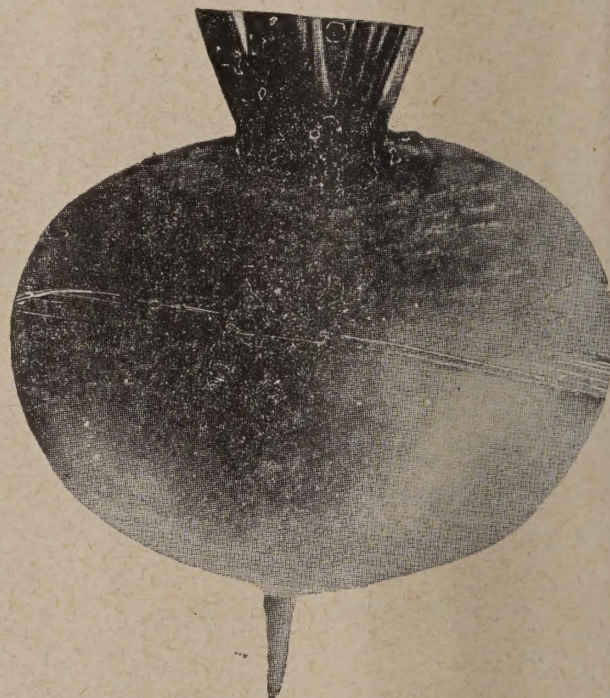

LIMA—

Tall or Pole—Require tall sticks.

Burpee's Bush—The best dwarf.

BEET 3d. and 6d. pkt.

Sow in rows 18 inches apart, and afterwards thin to 9 inches between plants.

Beet, Early Wonder.

EARLY WONDER—This has entirely superseded the "Egyptian Turnip Rooted" as the most popular market variety. It is earlier, matures more evenly, a good rich color and slightly deeper.

EGYPTIAN TURNIP-ROOTED—

Extra early flat red.

BLOOD RED—Long.

CRIMSON GLOBE—Round, smooth skin.

OBELISK—A half-long variety of handy shape for slicing, but not a popular market type.

SILVER OR SPINACH—Grown for the leaves only and cooked like spinach.

Dark Green Leaved.

Lucullus—Light green leaved.

Fordhook Giant—Dark green crinkled leaves.

Vegetable Seeds

BORECOLE 3d. and 6d. pkt.
GREEN CURLED—Best for table use.
THOUSAND HEADED KALE—

For poultry and stock food. 6d. pkt.

BROCCOLI 3d. and 6d. pkt.
 Treat the same as a Cauliflower.
EARLY WHITE—Best Early.

BRUSSELS SPROUTS
 3d. and 6d. pkt.

Sow in Summer in seed beds, afterwards plant into rows two feet apart.

Aigburth—Medium sprouts. Good.

CABBAGE 3d. and 6d. pkt.

Sow all the year round in beds; when large enough, plant out in rows 3ft. apart and 21 inches between the plants.

BURPEE'S ALL HEAD EARLY—

Short-stemmed, heads large, flat and closely packed; excellent for market.

BURPEE'S SUCCESSION—

An excellent American-grown strain of this popular variety.

ENKHUIZEN GLORY—

An excellent short-stemmed, medium-sized, round-headed early variety.

Henderson's Succession Cabbage.

PETER HENDERSON'S SUCCESSION—

True New York stock. A splendid variety for market. It stands the summer, carries well and hearts in regularly.

EARLY JERSEY WAKEFIELD—The best first early pointed head or sugarloaf type.

EARLY COPENHAGEN MARKET — Medium round-headed, short stem variety; excellent market sort.

EARLIEST FORCING GLOBE—An excellent small round early market variety.

GREEN GLAZE, APHIS OR FLYPROOF —Fly-resistant variety.

SHORT STEM EARLY DRUMHEAD—It will stand handling, and is a splendid market gardener's cabbage.

ST. JOHN'S DAY, IMPROVED LARGE —Best for summer use.

RED PICKLING, NIGGERHEAD.

SAVOY DRUMHEAD—For Winter use.

CHINESE CELERY CABBAGE—

Wong Bok—6d. pkt.

Pe Tsai—6d. pkt.

CAPE GOOSEBERRY 6d. pkt.
 Sow in Spring, for preserves.

CAPSICUM OR PEPPER

3d. and 6d. pkt.

Sow in Spring, 3ft. apart.

BULL NOSE, CHINESE GIANT, RUBY KING and SWEET SPANISH.

LONG RED—Slender and hot.

CARROT 3d. and 6d. pkt.

Sow in Spring, Summer and early Autumn. Plant in rows and thin to 3 or 4 inches between the plants.

Danver's Half-long Carrot.

CHANTENAY—Orange scarlet. Half long, stump rooted.

DANVER'S HALF-LONG—Orange scarlet, about 8 inches long, 3 inches across, tapers slightly, stump rooted.

EARLY HORN—

Short variety, best for shallow soils.

MANCHESTER TABLE OR NANTES— Early, half long, stump rooted.

RED STALKED INTERMEDIATE — Splendid market variety for winter bunching only.

ST. VALERY INTERMEDIATE— The best variety for general use.

Vegetable Seeds

CAULIFLOWER 3d. and 6d. pkt.

The soil should be deeply trenched and well dressed with stable manure. Late Summer and Autumn are the best seasons to sow, as they will not come to perfection in hot weather.

Cauliflower, Special Giant.

SPECIAL SORTS—These three varieties are used exclusively by the leading Sydney market growers, and are by far the best for private use. Our strain is grown exclusively for us, and our growers always top the Sydney market.

4 MONTHS SPECIAL GIANT. }
5 MONTHS SPECIAL GIANT. } 6d. per
6 MONTHS SPECIAL GIANT. } pkt.

EARLY LONDON—An old variety.

VEITCH'S AUTUMN GIANT—
A late sort, large and white.

WHITE QUEEN or Early Snowball—
Good early sort. 6d. per pkt.

CELERY 3d. and 6d. pkt.

GIANT PASCAL—Best for Winter.

GOLDEN PHENOMENAL—Self-blanching. 6d. pkt.

SOUTH AUSTRALIAN GIANT—White. 6d. per pkt.

WHITE PLUME—Best for Summer.

CORN (Sweet) 6d. pkt.

Sow in Spring in rows three feet apart, thin to a foot between the plants.

FINEST MIXED—

All the leading American varieties.

CRESS 3d. and 6d. pkt.

CURLED—For salads.

WATER CRESS—For moist places.

CUCUMBER 3d. and 6d. pkt.

Plant when danger from frost is over, in hills four feet apart each way, four plants in each hill.

CRYSTAL APPLE—An excellent pure white strain.

APPLE SHAPED—A round yellow variety.

AFRICAN HORNED—Skin green, turning orange when ripe.

Cucumber, Early Fortune.

EARLY FORTUNE—A splendid early dark green market variety; comes in before Perfect Green to which it is very similar in color and size.

PERFECT GREEN—The best late market Cucumber grown. Fruit is 8 to 9 inches long; no waste ends. Dark green in color, which it maintains a long time.

KIRBY'S STAYS GREEN—Another of the popular dark green types similar to early Fortune and Perfect Green.

STRAIGHT EIGHT—An excellent new market sort; green skin.

WHITE SPINE IMPROVED—
Not suitable for market.

BOSTON PICKLING—Used when size of finger.

WEST INDIAN GHERKIN—
Small, for pickling.

EGG PLANT 3d. and 6d. pkt.

Sow in Spring, 3 feet apart.

NEW YORK PURPLE.

ENDIVE 6d. pkt.

GREEN CURLED—Similar to Lettuce.

HERBS 3d. and 6d. pkt.

Sow in Spring or Autumn.

THYME, SAGE, MARJORAM, LAVENDER

KOHL RABI 3d. and 6d. pkt.

(TURNIP-ROOTED CABBAGE)

Sow in late Summer and Autumn.

PURPLE—Best for table use.

Vegetable Seeds

LEEK 3d. and 6d. pkt.

Sow early in Spring and Summer.

MUSSELBURGH—The best.

LETTUCE 3d. and 6d. pkt.

Sow all the year. Transplant from 9 to 18 inches apart; in dry weather sow in the permanent beds and thin to this distance; use liquid manure.

Lettuce, New York Special.

NEW YORK SPECIAL No. 4—This strain produces phenomenal results, and realises top prices in the Sydney market. It has immense solid cabbage heads, crisp, tender and free from bitterness, and very slow to run to seed. 6d. pkt.

NEW YORK No. 5—Another good strain of this much-esteemed market lettuce.

NEW YORK No. 12—The best of this type for summer.

IMPERIAL D—Splendid winter market sort.

IMPERIAL F—Excellent summer market variety.

IMPERIAL No. 615—For winter market.

IMPERIAL No. 847—For summer and autumn sowing.

Drumhead (or Malta), Neapolitan and Webb's Wonderful—Our New Yorks are much superior in every way to these three sorts.

HANSON (Improved)—A light green, very curly Summer variety.

ICEBERG—Well-known variety.

MIGNONETTE—

A splendid sort for hot climates.

MUSTARD 3d. and 6d. pkt.

MELONS (Water) 3d. and 6d. pkt.

Sow in late Spring in hills, four feet each way.

CUBAN QUEEN—Flesh red.

FLORIDA FAVORITE—Oblong.

KLECKLEY SWEETS—The improved strain. Dark green skin, crimson flesh

HAWKESBURY WILT-RESISTANT—

Large, grey with green veinings.

ICE CREAM—Scarlet flesh.

McIVOR SUGAR—Pink flesh.

MIXED WATER MELON—

A mixture of the best sorts.

SUGAR STICK—Light green skin, red flesh; best for market.

TOM WATSON—

Dark green skin, long. Deep red flesh.

MELONS (Rock or Musk)

3d. and 6d. pkt.

BANANA—Salmon flesh, 20 ins. long, 4 ins. thick.

CALIFORNIAN CREAM—Salmon flesh, cream skin; only suitable for long season hot climates.

CASSABA, HONEY DEW.

GOLDEN EAGLE—

Rich salmon flesh; netted.

HACKENSACK, EARLY—Flesh green.

HALE'S BEST, No. 36—Medium, netted, salmon pink flesh

HALE'S BEST No. 45—Mildew-resistant; the best of the Hales type.

MIXED ROCK MELONS—Mixture of the best early and late varieties.

ROCKY FORD (NETTED GEM)—

Netted, green flesh. Small but good.

Rock Melon, Sydney Market.

SYDNEY MARKET SPECIAL STRAIN—

Absolutely the best market variety grown. Very large, well ribbed and netted, rich golden flesh. Always commands top prices. 6d. pkt.

PRESERVING MELONS—

CITRON (Green Seeded).

CITRON (Red Seeded)—

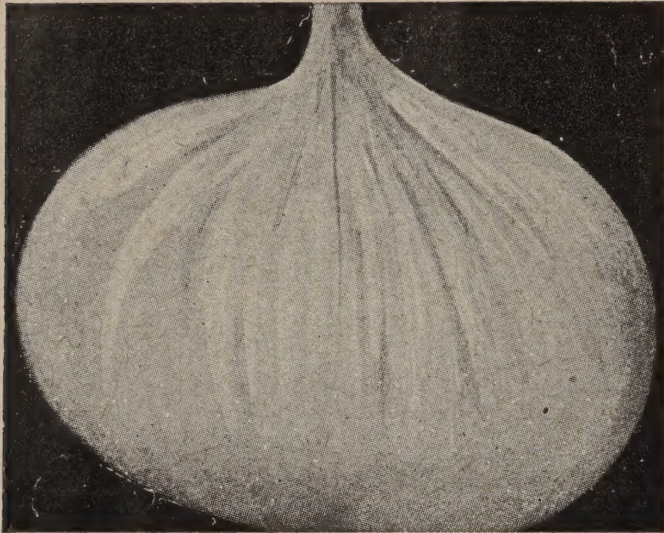

Round, dark green, striped light green.

Vegetable Seeds

ONION 3d. and 6d. pkt.

Sow in March, April, and May, in well worked ground, and afterwards thin out to 4 or 5 inches apart. Keep well weeded, the ground must be kept clean.

EARLY BARLETTA—
Pure white silver skin.

Onion, White Early Portugal.

EARLY WHITE PORTUGAL (An American Silver Skin)—A splendid type of onion not quite so flat as Barletta, but larger and more regular.

GOLDEN EMPEROR—
Large yellow. Globe shaped.

HUNTER RIVER EARLY BROWN SPANISH—Very early. 6d. pkt.

LORD HOWE ISLAND—
Flat, skin red, flesh white and mild.

BROWN SPANISH SELECT LONG KEEPING—Best main crop onion for market purposes.

ODORLESS—Very mild onion; excellent for the home garden. 6d. per pkt.

PRIZETAKER—Yellow skin, early, large size, mild flavour, good keeper.

SILVER KING—A large flat white, of Tripoli type.

SOUTHPORT WHITE GLOBE—The best of this type for market.

SPRING ONION—White onions, use young as shallots.

SHALLOTS—Bulbs only. Can be supplied from December to April

PARSLEY 3d. and 6d. pkt.

Sow during the Spring or Autumn.

MOSS CURLED—The favorite variety.

PARSNIP 3d. and 6d. pkt.

Sow in Spring, Summer, and Autumn. Plant in drills a foot apart, and thin to six inches between the plants.

HOLLOW CROWN—The best.

PEAS 6d. pkt., 9d. post paid.

Sow during the Winter, Spring and Summer months.

THE GEM—One of the best early dwarfs, pods dark green, medium size; heavy cropper; $1\frac{1}{2}$ feet.

GREENFEAST—

The most popular Pea grown for the Sydney market, where it is usually sold by the agents as "Wonders."

LITTLE MARVEL—18 inches. Good cropper; early.

RICHARD SEDDON or IMPROVED AMERICAN WONDER—18 inches.

STRATAGEM—Pods large; 3ft.

TELEPHONE—4 feet. The best tall variety.

YORKSHIRE HERO—Pods small, but they crop well; sweetest; 2ft.

NOTE—When Beans or Peas are ordered by post, kindly note postage should be 3d. per packet extra.

PUMPKIN 3d. and 6d. pkt.

Sow in Spring in hills 8 feet apart.

TRIANGLE (SHAMROCK IRONBARK)—Medium size, good keeper.

CROWN—Excellent; good flavor.

BEAUDESERT (or Queensland Blue)—Small, dark green skin, flesh rich orange. Boils sweet and dry.

TURK'S CAP—Good croppers. Early.

GRAMMA—For pies or for cattle.

RADISH 3d. and 6d. pkt.

Plant throughout the year. To have good, tender, crisp Radishes, they must be grown quickly.

FRENCH BREAKFAST—

Oval shape, red with white tip.

LONG SCARLET—Main market variety.

MIXED TURNIP—White and red

RED TURNIP—Market variety.

WHITE ICICLE—Long and crisp.

WHITE CHINESE OR CELESTIAL.

RHUBARB 3d. and 6d. pkt.

SYDNEY MARKET—Giant.

Rhubarb seed should be more largely grown, as it is of easy culture and much more economical than roots.

We can supply Giant Rhubarb Roots during the Winter season.

ROSELLA 6d. pkt.

Sow in Spring. Only suitable for very hot climates.

SALSIFY 6d. pkt.

A vegetable of an oyster-like flavor. Cultivation: Same as Parsnips.

Vegetable Seeds

SPINACH 3d. and 6d. pkt.

Sow in Spring, Summer and Autumn.
ROUND—For Summer use.
PRICKLY—For Winter use.

SQUASH 3d. and 6d. pkt.

EARLY YELLOW or GOLDEN BUSH—
 (Custard Marrow).
EARLY WHITE BUSH (Scalloped)—
 Best for market.
HUBBARD, GREEN IMPROVED—Good
 keepers, boils sweet and dry.
Do., GREEN WARTED.
Do., BLUE WARTED.
Do., GOLDEN WARTED.
Do., KITCHENETTE—Small size for pri-
 vate use.
BANANA (Monitor)—Long slender sort,
 good keeper.

SWEDE TURNIP 3d. and 6d. pkt.

Sow late Spring, Summer and Autumn.
IMPROVED PURPLE TOP—Our special
 strain; very much esteemed on the
 Sydney market.
LAING'S GARDEN SWEDE.
SKIRVING'S PURPLE TOP.

TOMATOES 3d. and 6d. pkt.

Sow when danger from frost is over.
 After the first fruits have set, check
 the growth of the plants by pinching
 off the ends of the shoots.

AUSTRALIAN EARLIANA—A local
 strain after the type of Bonny Best.

BONNY BEST—A selection of Early
 Jewel.

BREAK O' DAY—Similar to Marglobe.

BURWOOD PRIZE—
 Second early. Good for market.

CHALK'S EARLY JEWEL—Very deep,
 uniform, smooth, scarlet.

CHINESE RED—The earliest glass-house
 type.

DWARF CHAMPION—Early and pro-
 lific, grows erect without support.

EARLIANA—Extra early bright red, a
 very heavy cropper.

EARLY WONDER—Extremely early,
 round scarlet fruit. The best first early
 smooth skin Tomato grown. 6d. pkt.

GROTHEN'S GLOBE—Deep scarlet, solid
 and meaty.

JUNE PINK—Extra early, purplish pink.

KING HUMBERT—
 The best red egg-shaped sort.

MARGLOBE—Large globe, smooth red
 fruit; resists disease.

MARHIO PINK—Medium size, firm flesh.

MARHIO RED—Medium size, globe
 shaped.

MATCHLESS, BURPEE'S—
 Scarlet, solid and smooth. Late.

Tomato, Martin & O'Keeffe's Early Wonder.

MONEY MAKER—Extra early. Smooth,
 round, medium size.

PONDEROSA (Red)—Largest size, ex-
 cellent, good keeper.

RUTGERS—Scarlet red, globe-shaped.

SAN MARZANO—The largest egg-
 shaped variety.

STONE—Large red; best late sort.

WALKER'S RECRUIT—
 Small, smooth, round red fruit.

WOODWARDS SENSATION—Excellent
 small fruited type; prolific.

TURNIPS (Garden Varieties)

3d. and 6d. pkt.

Sow very thinly the whole year.

WHITE STONE or EARLY SNOWBALL
 —Good early variety.

LONG WHITE—An excellent sort for
 warm districts.

NEPAUL—Early flat white. Best market.

PURPLE TOP WHITE GLOBE—Very
 early, medium size; good.

GOLDEN BALL or ORANGE JELLY—
 Yellow flesh.

VEGETABLE MARROW

3d. and 6d. pkt.

LONG CREAM TRAILING—
 The best running sort.

LONG GREEN TRAILING—
 Good for private use.

LONG FRUITED WHITE BUSH—
 Best for market.

LONG FRUITED GREEN BUSH—
 Bush varieties do not run, and require
 the least space.

CUSTARD MARROW (see Custard
 Squash).

Garden Peas

The Advantages of Pure Line Breeding

The Garden Pea has been developed to its present standard by cross fertilization and constant selection through many generations, but there is a constant tendency to revert or throw back to something near to the original inferior species, therefore the same constant care and attention must continually go on to prevent this. Where the work is not done thoroughly and completely the deterioration is rapid, especially as these "rogues" or "throwbacks" are more vigorous and prolific than the true stock.

The process is laborious, requires knowledge and applied skill, and entails considerable expense, but is definitely essential if the quality is to be maintained.

For many years our New Zealand growers have followed this method of improving their stocks, and the splendid results our market pea growers have obtained from the use of these pure strains is ample justification of our policy of stocking only the best. We do not stock locally-grown farmers' dressed samples, which are grown in a haphazard fashion and in no case in the systematic way that they should be cultivated if grown solely for a seed crop.

In this country where we have big markets for the Green Vegetable Peas (such not being the case in N.Z.), the bulk of the crops are consigned to the markets and if and when the market price falls to an unprofitable level, then some growers save the residue for seed, and this inferior class of seed will not give satisfaction to anybody.

It is absolutely essential that the first crop of green pods must be left on the vines if first quality seed is to be obtained, and the work must be done by practical experts.

Pedigree Peas produce a greatly increased crop as well as a much heavier one, inasmuch as these pure strains have far more peas to each pod, and in addition they grow in pairs, whereas inferior "throwbacks" always grow single pods and much smaller in length.

Lawn Grass Seed

AGROSTIS TENUIS (Creeping Bent)

Undoubtedly one of the finest grasses for lawns; leaves narrow and flat. Dark green and of a slightly creeping habit and makes a fine green turf.

COUCH.

One of the best lawn grasses for the coastal districts. It should be sown in the warm seasons, after good rains, to ensure good germination. It is not suitable for our cold districts.

FINEST EVERGREEN MIXED.

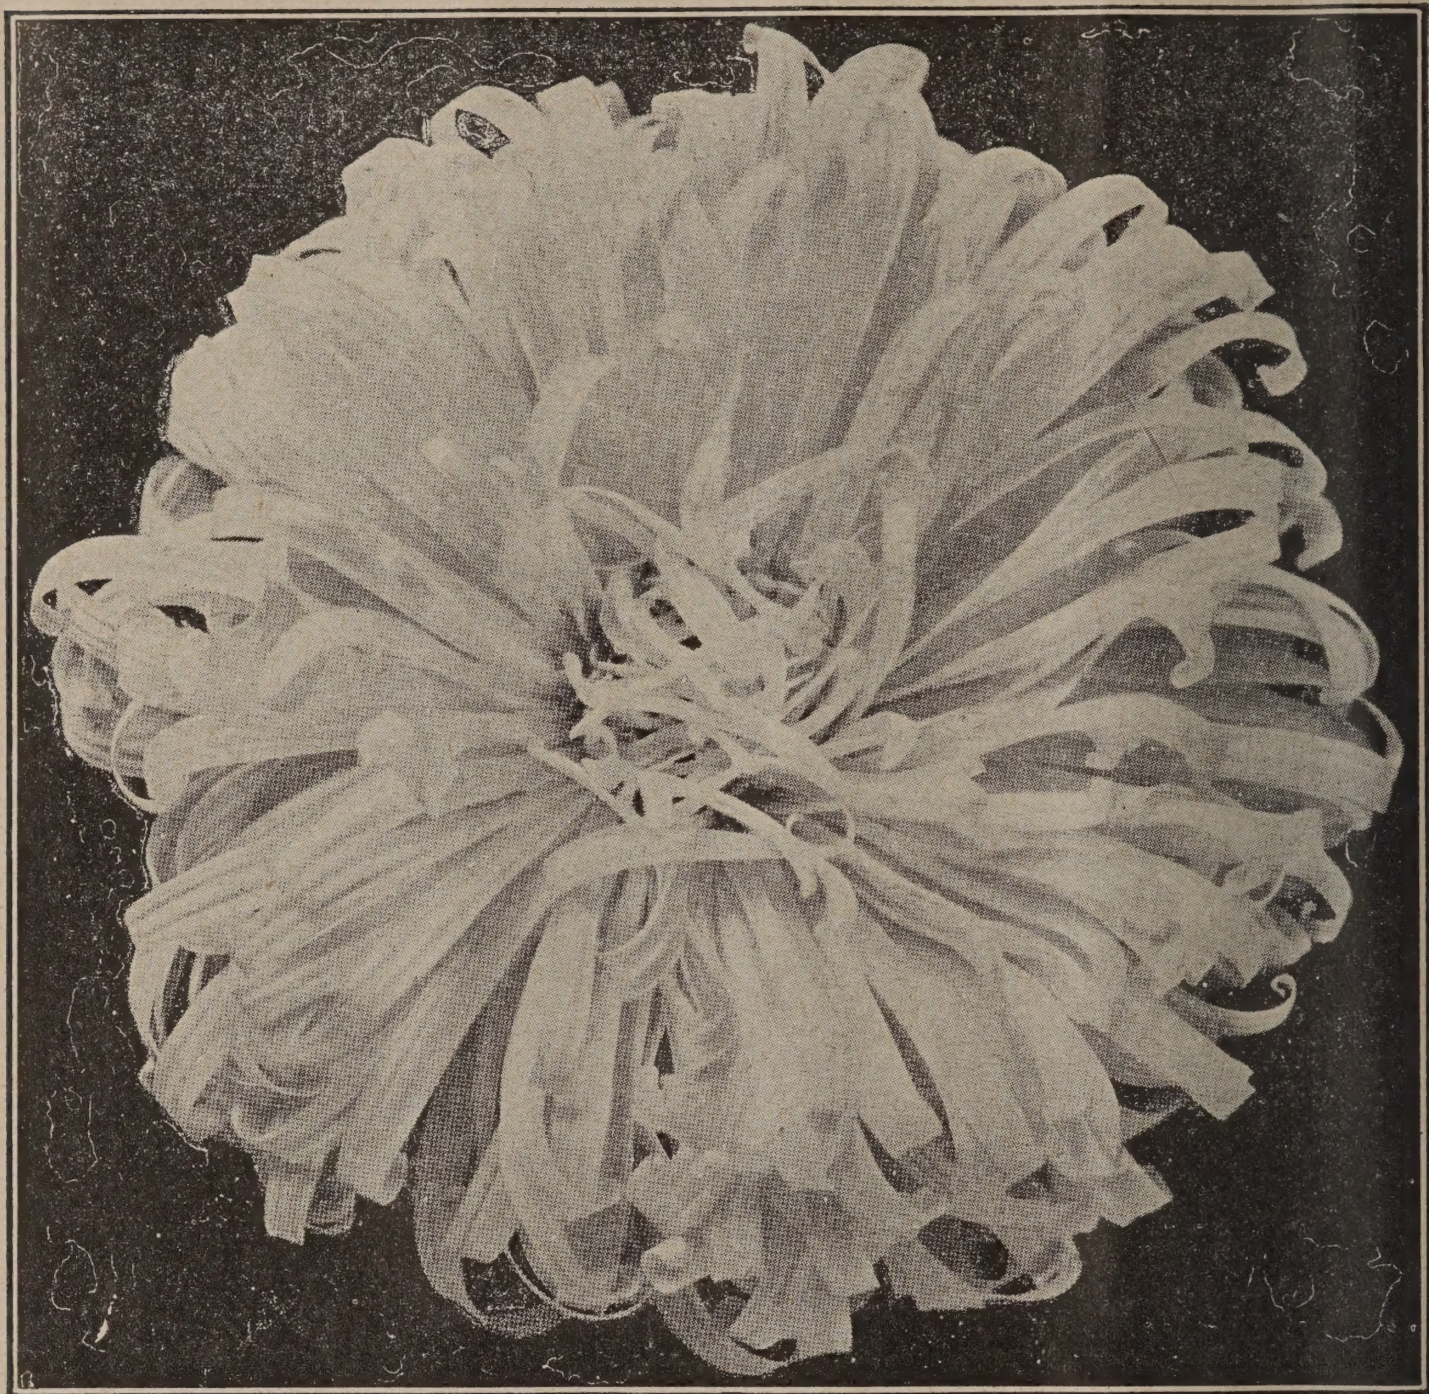

A mixture of the finest dwarf varieties to make a permanent sward. We make various mixtures to suit the different climates.

KENTUCKY BLUE (Poa Pratensis)

This grass resembles Couch in its habit, but should only be sown in the Autumn. It is a good Winter grass, and should be included in all lawn mixtures, particularly for our colder climates.

Prices on application.

Choice Flower Seeds

Aster, Californian Giant.

ASTERS.

Half-hardy annuals. Sow in Spring and Summer.

AMERICAN BEAUTY—

Excellent type for late planting.

Finest Mixed—6d. pkt.

Separate Colors—6d. pkt.

LUCERNE SEED

FINEST RE-SIEVED HUNTER RIVER BROADLEAF.

The best Season to sow Lucerne Seed depends on the climate. Where the Winters are not too severe, Autumn is best, but should the weather or other reasons prevent the sowing during this time, the seed should be planted as early in the Spring as possible. Most of the disappointments in growing Lucerne arise from the fact that the seed is planted too late, so that it never has a chance to get sufficiently rooted before the hot dry weather comes in. In the colder districts it is advisable to sow in the Spring.

The land should be well prepared before sowing and made thoroughly clean, otherwise the young Lucerne plants will probably be choked out before they are properly established. On the Hunter River Flats the farmer gets best results from sowing 17 to 20 lbs. seed per acre. In the dry country about 5 to 12 lbs. per acre is sufficient.

Quotations and Samples on Application.

Terms—Nett Cash.

NOTE.—We only stock seed saved from the Upper Hunter River District, and Seed Saved in this district still maintains its outstanding characteristics.
